Re: Bldg & M3-1  
Highways & Transportation

Mr. L. E. Brett, Jr.  
Resident Engineer  
Virginia Department of Highways  
Fairfax, Virginia 22030

Dear Mr. Brett:

Reference is made to the meeting between representatives of the Virginia Department of Highways and this Agency at your office on 11 December 1967.

In our opinion, the following actions will tend to alleviate the traffic congestion on Virginia Highway 123 at the entrance to the CIA property. This Agency will make arrangements to remove the concrete curb along the entrance road on U. S. Government property. We will also perform final slope or shoulder grading and any sodding or seeding required. The balance of the work would be performed by the Virginia Department of Highways. Essentially, this consists of any road work at the circle, including traffic signal equipment and/or adjustments thereto and all materials and labor necessary to widen the entry road on property of both the Commonwealth of Virginia and the U. S. Government. There would be no requirement to replace the concrete curb.

This Agency will reimburse the Commonwealth of Virginia for the cost of work performed on Federal land.

Your cooperative approach in working toward a mutually satisfactory solution is greatly appreciated. Please let us know if we can be of any assistance.

Distribution:

Sincerely,

1. Deputy Director for Support  
7D26 Headquarters

1. Based on a quick review, a rough estimate of around \$2,000 for our share of Virginia highway work appears in order.

2.

2. Also, we will need funds for GSA Group Forces. This is for curb removal, grass and sodding, etc. We are trying to get a rough estimate from Mr. Weaver for this work. The work should not cost more than an additional \$1,000.
